## PHARMACEUTICAL

Dispersion of sensitive material such as probiotica

### THE APPLICATION SCOPE / PURPOSE

The global market for functional food is growing, such as the use of probiotics in food for pharmaceutical applications. It can have multiple health stimuli like on the gut flora, the pediatric gastroprotection, food allergy reduction, on the immunomodulatory and anticarcinogenic activity or the cholesterol level. A gentle processing is required to disperse sensitive material like probiotics into liquids. Kinematica has a solution to this kind of applications based on a dynamically enhanced membrane technology.
